SKILLS

- Near 20 years of coding experience and 14+ years of C++.
- Highly experienced in Data Oriented Design, ECS, high-performance, multi-threading, serialization, compilers and more.
- Deep proficiency with game engines like Unreal Engine, Frostbite or Snowdrop.
- Owned & shipped many game systems for AAA game titles.
- Advocate for best practices, developer experience and good communication in multidisciplinary teams.
- Trained in Agile, Scrum, and other methodologies.

EDUCATION

Degree in Videogame Design and Development

2015-2019 – UDIT

Back-End Development

2014 – Ironhack

Web-development bootcamp involving HTML5, CSS3, Javascript, Back-End, Git, Rails, MVC and more. Formed in Agile development and delivering real products.

INTERESTS

Video-games, Voice-acting, Music, Reading, Carpentry

PROFILE

Proactive and enthusiastic programmer who loves working with talented people, learning new technologies, and facing new challenges every day. This feeds my strong desire for self-improvement.

I thrive in an environment surrounded by multi-disciplinary people, building fast, complex and reliable technology with the ultimate goal of delivering great digital products.

OBJECTIVE

To contribute to the videogame industry with advanced technology, tooling, methodologies, and best practices for the benefit of developers and players. With an sparkle of good design!

EXPERIENCE

Senior Gameplay Programmer

Jun 2024 – Present

Raw Power Games

Copenhagen, Denmark · Remote

- Designing and implementing multiple, scalable, core systems using Unreal Engine 5 and ECS for *Chronicles: Medieval*.

Programmer Madrid, Spain

Mar 2016 – Present

Piperift

Madrid, Spain

- Creating a compiled visual language for games called Rift.
- Released multiple open-source gameplay systems for Unreal Engine 4 & 5 involving Factions/Teams, Attributes, Quests, Game Saves, Serialization, Dialogues, AI and more.
- CI/CD pipelines for packaging, testing, and deploying stable binaries into multiple platforms.

Senior Audio Programmer

Sep 2022 – Jun 2024

CI Games

Barcelona, Spain · Remote

- Evaluated and fully integrated third-party audio platforms
- Owned the design & implementation of audio systems for multiple unannounced IPs
- Worked on reactive narrative, occlusion & obstruction, procedural audio systems, and others.

Senior Gameplay Programmer

Sep 2022 – Jun 2024

CI Games

Barcelona, Spain · Remote

- Owned the design & implementation of gameplay and engine systems for multiple unannounced IPs and in a wide range of topics that relate to data-driven gameplay, game design, audio and animation.

ACHIEVEMENTS

- Speaker at 'Git and LFS for Game Development'
- Speaker at 'Introduction to UE4'
- Best Game, Best Player Experience & Best VR Game (GGJ Madrid 2017)
- Best Viable Product (GGJ Madrid 2016)

REFERENCES

Please contact me so I can send you their contact information.

Gameplay/Tech Programmer

Ubisoft Stockholm

Mar 2021 – Sep 2022

Stockholm, Sweden · Hybrid

- Implementing engine and game systems involving gameplay, networking, serialization, physics, debugging, and more for an unannounced game & Scalar
- *"Games using Ubisoft Scalar can use a virtually unlimited amount of computing power, and thus run anything from virtual worlds of unprecedented scale and depth to vastly detailed simulations that wouldn't be possible otherwise."*

AI Programmer

DICE EA

Jul 2020 – Mar 2021

Stockholm, Sweden · Remote

- Implemented engine and game features for a new artificial intelligence system enabling designers to build AI for *Battlefield 2042*

Gameplay Programmer London, UK

Splash Damage

Jun 2019 – Jul 2020

London, United Kingdom

- Tasked with the design and development of multiple Gameplay systems, as well as core gameplay refactoring for data-driven content creation.
- *Outcasters* is a competitive, 8 player multiplayer game where you fight your friends and team up to beat your enemies. Google Stadia exclusive.

Gameplay Systems Programmer Toronto, CA (Remote)

Lever Games

May 2018 – Jun 2019

Toronto, Canada · Remote

- Worked on *No More Room In Hell 2*, a coop FPS game where you survive with your intellect.
- Owned the design, implementation and tooling of open-world gameplay systems like narrative, quests or world generation.
- Learned from experienced team members and used C++, Unreal Engine 4, UnrealGameSync and Perforce.
