

MIGUEL FERNANDEZ ARCE

SENIOR SYSTEMS ENGINEER

C++ / RUST

PROFILE

Proactive and passionate programmer who thrives around talented, multi-disciplinary people, building fast, complex, and reliable technology. Loves learning new technologies and facing new challenges, driven by a strong desire for self-improvement.

EXPERIENCE

Senior Systems Engineer

Raw Power Games

Jun 2024 – Nov 2025

Copenhagen, Denmark · Remote

- Scalable core simulation systems in C++ (UE5, ECS) for Chronicles: Medieval.
- Data oriented design, cache-efficiency, mesh and graph algorithms.

Founder & Systems Programmer

Piperift

Mar 2016 – Present

Madrid, Spain

- **Rift**, a compiled visual language: Architecture, parsing, code generation, toolchain integration.
- Released C++ libraries for Unreal Engine (serialization, ECS, AI, memory, etc). Well-optimized, cache-aware and multi-threaded.

Senior Systems & Audio Programmer

CI Games

Sep 2022 – Jun 2024

Barcelona, Spain · Remote

- Owned data-driven C++ engine systems across gameplay, animation, and audio.
- Real-time audio systems: low-latency processing pipelines, occlusion & obstruction, procedural audio. Integrated third-party middlewares and SDKs.

Tech Programmer

Ubisoft Stockholm

Mar 2021 – Sep 2022

Stockholm, Sweden · Hybrid

- Engine systems for networking, serialization, and physics on **Ubisoft Scalar**, a distributed cloud-compute platform.

AI Programmer

DICE EA

Jul 2020 – Mar 2021

Stockholm, Sweden · Remote

- Implemented engine features for a new AI runtime enabling designers to build AI for Battlefield 2042.

Gameplay Programmer

Splash Damage

Jun 2019 – Jul 2020

London, United Kingdom

- Built networked multiplayer systems for Outcasters (cloud-streaming, low-latency constraints).

Gameplay Systems Programmer

Lever Games

May 2018 – Jun 2019

Toronto, Canada · Remote

- Owned open-world systems (narrative, quests, world generation) for No More Room In Hell 2 (UE4, C++).

SKILLS

- 14+ years of professional C++ (17/20/26), C, Rust, Python; ~20 years coding.
- Real-time, high-performant low-latency systems.
- Data oriented design, cache optimization, concurrency, profiling.
- TCP/UDP networking, serialization, reflection, compilers & interpreters, tooling & CI/CD.
- Cross-platform Linux, Windows, MacOS.
- Best practices, good communication, agile, scrum and other methodologies.

OPEN-SOURCE

- C++ libraries for Unreal Engine. ~450k users.
- **Pipe**: cross-platform C++ foundation library.
- **Rift**: compiled language (parser, codegen, IR, JIT).

SPEAKER

- 'Game DEV & Technical Design'
- 'Git and LFS for Game Development'
- 'Introduction to UE4'

EDUCATION

Degree in Videogame Design & Development

2015-2019 — UDIT

Back-End Development

2014 — Ironhack

Rails, JS, HTML, CSS, Git.
